

Assignment: 1

1. Provide a brief history of Java, including its creators and evolution.
2. Explain the features of Java.
3. List the advantages of Java.
4. Define bytecode. How does the JVM execute programs to achieve platform independence?
5. Explain the Java Development Kit (JDK) with a diagram.
6. Describe the Java Runtime Environment (JRE) and explain Java Standard Library (JSL).
7. Compare Object-Oriented Programming (OOP) and Procedural-Oriented Programming (POP).
8. Explain the structure of a simple Java program. Discuss the purpose of the `main` method and the meaning of `public static void main(String args[])`.
9. Describe command-line arguments and write a program to add two numbers using command-line input.
10. Explain read statements, including `console().readLine()`. Write a program to print your name.
11. What is the `Scanner` class? Why is it used? Write a program to find the maximum and minimum among three numbers using the `Scanner` class. Also, list applications of Java.
